Yale Triplex Block

"From hook-to-hook-a-line-of-steel"

IN the round house or shop the Yale Triplex Block is the best emergency hoist because it has the greatest overload capacity. It is rated on the basis of the long ton (2240 pounds to the ton).

Each rated ton capacity is actually tested before it leaves the factory with a load of 3360 pounds.

"Safety First"

The one ton Yale Triplex Block will lift a two or three ton load without dropping it. The chain requires three times the rated load to stretch it and more than five times the rated capacity load to break it.

FORD TRIBLOC A CHAIN HOIST THAT

Has Planetary Gearing

80 Per Cent Efficiency

Has Steel Working Parts

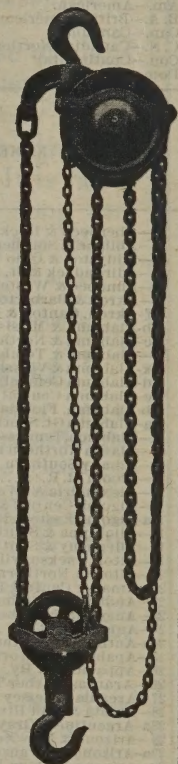

Has 3 to 1 Factor of Safety

That's the synopsis of the good points of the Ford Tribloc. They're the qualities you have to look for in any chain hoist if you want the maximum of service.

We build chain hoists in every size from 1 ton to 40 tons, and have an interesting catalogue illustrating and describing them. Don't you want a copy?

Dearborn Boiler Feed Water Treatment

FOR PREVENTION OF

FOAMING, PRIMING, SCALE FORMATION, PITTING AND CORROSION.

Waters analyzed in our laboratories, and treatment prepared to handle conditions on each division or district, as shown by analyses. A scientific method of treating boiler waters that insures success. Expense per thousand gallons of water treated less than by any other method.

Gallon samples of the water supplies required for analysis. When reports are completed, we are ready to prepare treatment, and will send an expert engineer to instruct in the proper handling of the material.

ALEXANDER CAR REPLACER. See page 218.

I H C Combined Pumper

This outfit has proven itself the most satisfactory of all pumping plant combinations. The engine power is steady and dependable. Transmission to the pump plunger is through machine-cut charcoal iron gears and a pump connecting rod of locomotive type. Large hand holes at both ends of the valve chamber permit the easy removal of foreign substances from the valves; the hand hole plates can be removed without disturbing the air chamber. Discharge pipe faces in any one of four directions. The bolts which hold the pump to the engine base can be kept tight without disturbing engine base on foundation. The new lever clutch is self-locking.

Full information regarding this safe, dependable outfit will be sent on request. Address :

International Harvester Company of America

B. E. TILDEN & CO.104 N. Wabash Avenue
CHICAGO

Works: DANVILLE, ILL.

Owing to a long felt want for some fastening to hold REPLACING FROGS to the base of track rails, we have added a CLAMP which holds them to their place under all conditions.

All legitimate Replacers of this style have our name thereon in raised letters; all others are infringements. Our make of Replacing Frogs is fully adapted to the replacing of all cars and locomotives to any rail.

Any car replacers composed of a shell having walls of different relative heights and a curved or segmental top uniting the upper edge of the walls, the said top being curved transversely, are infringements upon our patents.

Price of our improved REPLACING FROGS with CLAMPS, \$18.00 per set. Improved extra heavy replacers, with holding clamps for replacing modern locomotives and all other rolling stock to any rail \$20.00 per set. Giant Special replacing frogs \$22.00 per set.

We deliver in lots of three pairs or more to any Railroad in the United States east of Mississippi River, to Roads west thereof, we assume the freight in excess of Mississippi River, freight to destination.

Steel Back Brake Shoes THE RAILWAY MATERIALS CO.
New York - Chicago

10 REASONS FOR USING "NATIONAL" PIPE

1. "NATIONAL" Pipe withstands the severe conditions of railway service.
2. "NATIONAL" Pipe uniformly resists corrosion.
3. "NATIONAL" Pipe is durable.
4. "NATIONAL" Pipe has a constant chemical uniformity.
5. "NATIONAL" Pipe has superior physical properties.
6. "NATIONAL" Pipe is Spellerized in sizes 4 inches and under.
7. "NATIONAL" Pipe is rigidly tested and inspected.
8. "NATIONAL" Pipe is made in full standard weight only.
9. "NATIONAL" Pipe gives clean cut, sturdy threads.
10. "NATIONAL" Pipe is marked with the name "NATIONAL."

There are many other reasons for the use of "NATIONAL" Pipe. You should know them. Write for a copy of "NATIONAL" Bulletin No. 11. It's free.

Lupton

Steel Sash

Made of specially rolled steel sections. Gives unequalled results in side wall day-lighting and ventilation. Improves your building, practically eliminates maintenance cost, makes your labor more productive.

Pond Continuous Sash

For roof lighting and ventilating. Overcomes all objections to sawtooths and monitor sash because it offers a continuous lighting and ventilating area, weather proof open or closed.

Pond Operating Device

Will settle for all time your difficulties in operating long or complex lines of sash.

Our catalogue, which describes these and other Lupton products, should be in your files. Ask for a copy.

Railway Steel Spring Co., LATROBE LOCOMOTIVE and CAR WHEEL TIRES, New York

WOLHAUPTER SHOULDER FLANGE

TIE PLATE

**STRONGER
FOR
WEIGHT OF
METAL USED
THAN
ANY OTHER
FORM OF
PLATE**

The half-inch
high shoulders
absolutely
prevent
Shearing of
Spikes
and Spreading
of Rails

The Flanges
prevent motion
between Plate
and Tie and
give maximum
resistance
against lateral
thrust of rail

**IS LESS
DESTRUCTIVE
TO A TIE
THAN
ANY OTHER
FORM OF
PLATE**

THE NEW WOLHAUPTER AND Q & W TIE PLATE

SEND FOR OUR CATALOGS

MILLER'S

As a Disinfectant It Stands Alone

1—ODORLESS.

Cleansing, Purifying.

2—DEODORIZING.

Kills Odors.

3—GERMICIDAL.

Kills Bacteria Germs, Diphtheria, Typhoid, Pus-Bacteria, Prevents Contagion.

4—VERMIN ERADICATOR.

Rats, Mice, Ants will not remain where O. D. Disinfectant is used.

SEND FOR 5 GALLON TRIAL QUANTITY

SATISFACTION GUARANTEED

**Odorless Disinfectant****Deodorizer and Germicide**

For Closets, Urinals, Sinks, Cuspidors, Cellars, Chicken Houses, Theatres, Schools, Hotels, Public and Private Buildings, and All Places Where Disinfectants Are Required.

Hoof and Mouth Disease Disinfectant.

Powerful—Instantaneous

Non-Poisonous

Will not Injure Hands or Fabric

Copy of Tests Made by

ALDEN WILLIAMS

City Bacteriologist

Grand Rapids, Michigan

Antiseptic Test of Product O. D.

(A)—One half ounce per gallon water inhibits growth of Typhoid, Diphtheria, and pus bacteria, by agar test of November 20, 1911.

(B)—One ounce per gallon water kills completely all bacteria. Cultures made one-half hour after application.

Deodorizing Strength of O. D.

(A)—One half ounce per gallon water lessens by ninety per cent the gas from decomposing urine, sulphide preparations and ammonia preparations.

(B)—Two ounces per gallon water absorbs all odors in ten minutes, as per record of November 20th, 1911.

(Signed)

ALDEN WILLIAMS

File No. 12399.

DIXON'S GRAPHITE ENGINE FRONT FINISHES (PASTE)

Six to nine weeks of service, in all kinds of weather, is what may reasonably be expected from each application of these special graphite preparations. This remarkable economy results from the heat-proof quality of Dixon's Flake Graphite and its peculiar faculty of practically making itself a part of the metal of the boiler. Black or grey finish can be supplied—both are described in Booklet No. 36, "Graphite Products For The Railroad."

Made in JERSEY CITY, N. J., by the

JOSEPH DIXON CRUCIBLE CO.

ESTABLISHED 1827

Railway Supplies are Classified and Indexed on pages 61 to 165.

STANDARDS FOR RAILWAY SERVICE

**INGERSOLL-
RAND**

**AIR & GAS COMPRESSORS
PNEUMATIC TOOLS
PNEUMATIC HOISTS
ROCK DRILLS
CORE DRILLS
SAND RAMMERS
COAL CUTTERS
PUMPING SYSTEMS**

Built as well as it is possible to make them, in the largest shops in the world devoted to this line of product, and backed by the guarantees of the oldest, largest and most responsible builders of this class of machinery in the business.

BOILER MAKERS' TOOLS

We make a specialty of railroad work and have a complete line of the following :

Roller Flue Expanders
 Sectional Flue Expanders
 Pneumatic Flue Expanders
 Arch Flue Expanders
 Tube Cutting Machines for Locomotive Tubes
 Safety Sectional Expander with Quick-Acting Knock-Out
 Beading Tools
 Superheater Flue Expanders

If you want special patterns, submit blue print or template and we will furnish estimates.

THE Edison Storage Battery

For Train Lighting and Signal Work

has had a greater effect on railway equipment and has shown a more rapid increase in its own volume of business than any device in previous railway history.

Read Bulletin 1018 and Understand Why

THE EDISON NICKEL-IRON-ALKALINE GUARANTEED BATTERY

MADE BY THE

Edison Storage Battery Co.
159 Lakeside Ave., Orange, N. J.

Pyrene
TRADE MARK

FIRE EXTINGUISHERS ARE A NECESSITY

FOR EVERY RAILROAD IN THE UNITED STATES

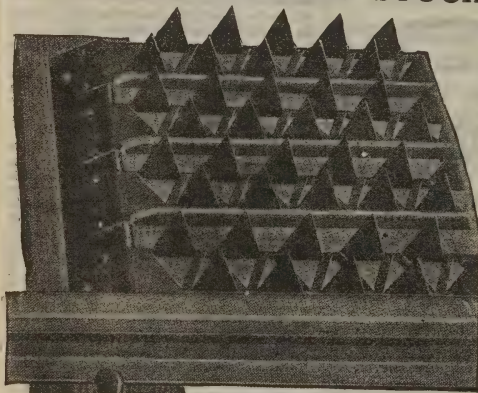

Pyrene is the most effective extinguisher of fires in highly inflammable material.

Pyrene is a non-conductor of electricity.

Write for booklet on protection of railroad property from fire.

WATROUS Push Button Self-Closing Bubbling Cup

With attachment for filling drinking cup or glass. This Combination attached to Water Cooler for Railway Cars. This Fixture is designed to replace the faucet arrangement on front of Cooler. Attachment being

made through the faucet opening by simply removing the faucet and attaching the Bubbling Cup. The Bubbling Cup is so arranged that it may be swung in either direction—entirely out of the way while not in use, or into convenient position while in use.

THE WATROUS CAR CLOSET

Is made in one piece. Has no joints or packing to become foul. Occupies a very small space and can be operated by either air or gravity water pressure.

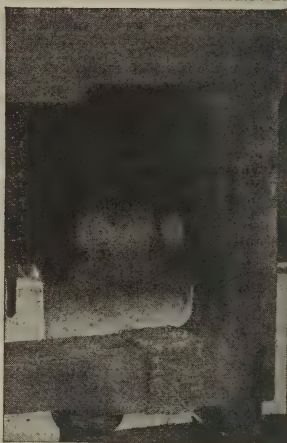

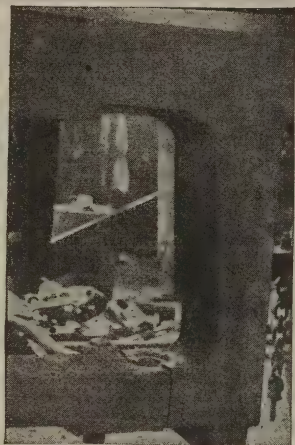

FULLY GUARANTEED

THE WATROUS CO.
(NOT INC.)

14 E. Jackson Boulevard, Chicago, Ill.

REPAIRING A CRACKED LOCOMOTIVE FRAME

The illustration shows how a bad crack in a locomotive frame was repaired by a

C & C ELECTRIC ARC WELDING OUTFIT

This entire job was done without dismantling the locomotive

Many other novel repair jobs in railroad repair shops are illustrated in our new Catalog R 513. If interested in learning of the remarkable work that has been done by these outfits in repairing corroded seams in boilers, cutting out bad spots and welding in new patches, welding leaking air reservoirs, cracked flue sheet ridges, cracked cylinders, building up worn parts, welding steel car roofs, repairing broken machine tools, etc., ask for the above catalog. It also contains curves showing the efficiencies and tables giving the cost of making ordinary welds.

THE REASON WHY

Sixty-one
Railroads
are now
Using

Laidlaw-Dunn-Gordon Compressors

is that they are a more profitable investment than any others. For a given price we can offer the most, both in the machine itself and its performance.
~~Because~~—our new and modernly equipped foundry minimizes our casting expense.
~~Because~~—our special machine tools and up-to-date shop management further reduce our production cost, leaving more margin for material and workmanship.
~~Because~~—our Cincinnati air valve gear is the most efficient yet developed

Send for Bulletin L521-57 A, or, preferably, visit our factory.

TRADE MARK.

REG. U. S. PATENT OFFICE

The Standard for **RUBBER INSULATION**

Whether purchased in the open market, from our agents, or direct from us, *Okonite* insulated wires never fail to meet, unconditionally, the most searching specifications and consequently the severest requirements of any service.

OKONITE is made in but *one* grade—the *best*.

LOOK FOR THE RIDGE

A distinguishing mark on genuine OKONITE insulation consists of a single ridge running the entire length of the wire.

PITTSBURGH STEEL PRODUCTS COMPANY

Manufacturers of

**Seamless
Steel Boiler Tubes
Arch Tubes
Superheater Flues
AND
Pipes**

are made from highest quality basic Open Hearth steel, very low in sulphur and phosphorus, and therefore resist corrosion and pitting; are true to size and gauge, fit perfectly in the flue sheet and decrease the cost of installation; they have no weld, have greater tensile strength and elastic limit, a greater factor of safety, and increase the efficiency of boiler service.

LOCOMOTIVE SUPERHEATER COMPANY

30 Church Street, New York

OVER 12,000 ENGINES IN SUCCESSFUL OPERATION

The Superheater Locomotive will produce:

- (1) A coal economy of 20 to 25 per cent.
- (2) A water economy of 25 to 35 per cent.
- (3) A smarter engine, working at a reduced boiler pressure.
- (4) A reduction in cost of boiler maintenance.
- (5) A more powerful engine, without increase in weight.

SHERBURNE & COMPANY

53 OLIVER STREET, BOSTON, MASS.

Railroad Supplies

Locomotive and Car Wheel Tires
 Steel Tired Wheels and Rolled Steel Wheels
 Axles and Forgings
 Car Heating and Lighting Equipment
 Sherburne Patent Car Door Holders
 Hydraulic Jacks and Machinery, Car Lamps, Basket Racks
 Hand, Push and Velocipede Cars
 Gasoline Engines for all power purposes
 Gasoline Engines for operating Turn Tables
 Gasoline Air Compressors
 Shovels, Scoops, Car Replacers
 Engine Replacers
 Track Tools, Sherburne Rail Benders
 Track Drills
 Track Jacks, Lifting Jacks, Nut Locks
 Track Spikes, Track Bolts, Track Gauges
 Trucks, Barrows, Wire Rope, Switch Ropes
 Railroad Fusees and Torpedoes
 Headlights, Lanterns, Switch Lamps
 Farrington Machines with Mills Attachment
 Industrial Railway Equipment
 Cotton and Woolen Waste

BRAKEMAN'S AIR BRAKE AND SIGNAL COCKS

For Controlling from rear of trains when backing.

The whistle is blown by pressing the button (B) shown in the cut, which allows air to pass through the hollow handle of the cock to the whistle, which is shown on the end of the handle, blowing the same and giving the necessary alarm.

By moving the handle of the cock in either direction exhaust is made from the train pipe, through opening C, the brake set, and consequent positive control of the train given.

The Permanent Roof

IN the Cortright Roof, there are no exposed nails to rust off, no chance for wind to get under the shingles and blow them away.

The first cost is little if any more than a good wood shingle roof but it is then perfect, permanent protection, without maintenance expense which make

Cortright Metal Shingles

so much cheaper in the end. Don't buy the roofing for the new building or reroof the old until you have investigated Cortright Metal Shingles.

At least let us send you our new book on modern roofings. There's no obligation.

J-M Flexible Metallic Combination Hose

consists of an inner lining of rubber and an outer protecting armor of interlocking metal spirals. It will outwear many ordinary metal hose. Therefore it gives maximum service at the lowest expense. The outer armor will outwear many inner linings.

Made for boiler washout, air tools, steam terminal yard, Pintsch gas, suction, oil and locomotive squirt hose.

Our Booklet fully describes every feature. Write nearest Branch for a copy.

J-M Keystone Hair Felt

Used as standard insulation for refrigerator cars.

J-M Keystone Salamander

For steel passenger equipment car insulation.

Mayari Steel

Is Used in

Steel that makes a shovel which is practically indestructible. A steel made from Mayari Ore, that contains in its natural state, those alloys which make steel tough and wear-resistant—nickel and chrome.

You tell the Wyoming-Mayari by a patented feature that's distinctive—**The Red Edge on the Blade.**

Two books "Scientific Shoveling," and "Wyoming-Mayari Steel Shovels" tell the story.

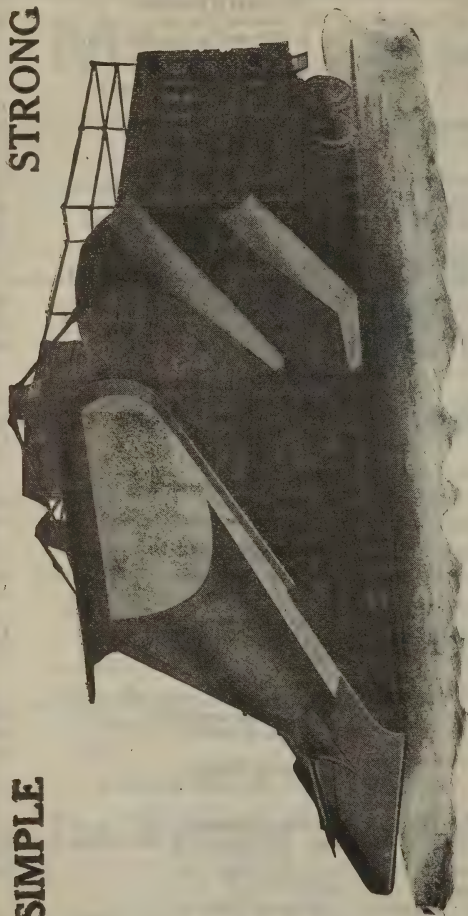

WRITE FOR THEM.

The Wyoming Shovel Works
Wyoming, Pa.

Makers of Good Shovels for over 40 Years.

Railway Supply Traveling Representatives are named on pages 163 to 215.

THE AMERICAN STAYBOLT SPELLS ECONOMY

Requires no special preparation of the boiler.

Supplied finished ready to apply.

Applied similarly to the ordinary stay.

Requires minimum time and expense for government inspection.

REASONS WHY

Has maximum flexibility of body.

Has maximum life.

Gives increased life of inner sheet.

Minimizes maintenance cost.

Increases the availability of your engines.

No More Oil Barrel Yarns

Not only is oil lost and wasted at the oil barrel, but men's time and energy are consumed. That's double loss. Bowser stops all that.

BOWSER
ESTABLISHED 1885

**Safe Oil Storage
Systems**

To-day in efficient shops and yards Bowser Systems store the oil, keep it clean, measure it as it goes out—deliver exact quantities at a stroke. There can be no lost time, lost oil, or lost motion. Unknown "leaks" are ended. Oil is conserved. Thrift encouraged. Premises kept "ship shape." The economy and all 'round efficiency pay big dividends.

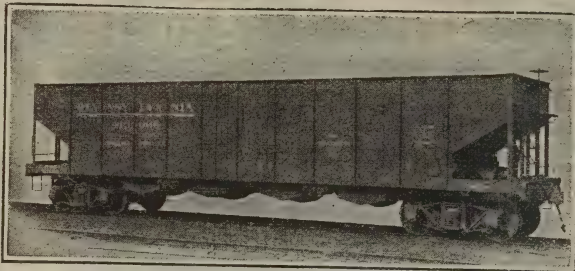

Investigate Learn how 200 railroads are using and saving oil the Bowser way. You too, can do it. Write today. The facts will surely interest you.

S. F. Bowser & Co., Inc.

FIBRE TORPEDOES, NON-FLYING

We make Railroad torpedoes of every type. We recommend the fibre torpedo. Their use eliminates all dangers.

They have been in use for 7 years on such roads as the Pennsylvania R. R. and many other large systems. Their use is compulsory on every road in Massachusetts.

See following page for list of our branches.

Central Railway Signal Company

Manufacturers of

FUSEES

TO COMPLY WITH

BUREAU OF EXPLOSIVES SPECIFICATIONS

Manufactured under the well known brands

**Granite, Hopewell, Western,
Versailles and Dominion**

These fusees cannot ignite spontaneously, neither can they develop conditions which will cause them to explode. They cost no more than the better grades of fusees of the old type.

The Winslow Washout System.

The life of a locomotive depends upon the care which it receives.

Care of a locomotive in large part means proper washing and refilling.

The most successful washing and refilling depends upon the Winslow System.

Wreck Train vs. One Man

OUR STEEL CAR REPLACER

**CAN BE CARRIED BY ONE MAN AND WILL
REPLACE THE HEAVIEST LOCOMOTIVES**

MADE FROM 9-16 INCH STEEL PLATE

**It is Light, Strong, Saving, Efficient, Sure, Cheap.
It is the Best Wrecking Frog on the Market.**

70,000 PAIRS IN SERVICE

- Size No. 1. Weight 164 lbs. per pair (standard)
Size No. 2. Weight 158 lbs. per pair (standard)
Size No. 3. Weight 58 lbs. per pair (for light Locomotives
and Electric Motors)
Size No. 4. Special Extra Heavy Weight, 212 lbs. per pair

Alexander Car Replacer Mfg. Co.
SCRANTON, PA. U. S. A.

For mutual advantage please mention Pocket List when writing advertisers.

THE POCKET LIST OF RAILROAD OFFICIALS.

The number prefixed to the name of each Company will be used in several tables of this book to indicate such Company.

† Railroad officials who are supplied with the standard Cipher Code of the American Railway Association.

¶ Officer in charge of Purchase of Supplies.

§ Indicates Officer in charge of Car or Locomotive Painting.

★ Officer in charge of Mechanical work, where the fact is not indicated by his title.

We would call especial attention to the arrangement of data contained in his department of the Pocket List of Railroad Officials. Please note that each list of officers is arranged in the following order:

EXECUTIVE, FINANCIAL AND LEGAL.

ACCOUNTING.

PURCHASING.

TRAFFIC AND CLAIM.

OPERATING AND TELEGRAPH.

MECHANICAL.

ENGINEERING, BRIDGES AND ROADWAY & SIGNALS.

Attention is also called to the fact that Transportation Companies and Car Lines have been grouped in that part of the book immediately following list of railroad officials, and are numbered 1201 to 1554.

Westinghouse

Modern Railway Safety Appliances

For Freight Cars: The Type "K" Automatic Triple Valve, including quick-service, uniform-release, uniform-recharge features.

For Passenger Cars: Improved automatic brake equipment, providing quick-service, graduated-release, quick-recharge and high-pressure emergency features.

For Engine and Tender: The "ET" equipment, combining the advantages of both automatic and straight air brakes, and allowing manipulation of locomotive brakes independently or in conjunction with train brakes, and possessing numerous other valuable features.

The CC—8½ Cross Compound Pump: For very heavy service, having large capacity, extraordinary economy in steam consumption and low maintenance cost.

The Self-Locking Angle Cock which *locks* the handle in either open or closed position.

*We can render you valuable assistance
in working out any braking problem*

REFRIGERATOR CAR INSULATION

A ship without a rudder is not as unsafe and helpless as a refrigerator car without proper and sufficient INSULATION. Four-ply of the best car lining in the world (LINOVELT) was used in our Union Fibre Car No. 1. After four years of constant travel—NOT A PENNY HAS BEEN PAID FOR CLAIMS

ON ANY FREIGHT LOADED IN THIS CAR. A PERFECT RECORD. Any road is welcome to test this car free of cost. Linofelt is used exclusively by leading railroads at home and abroad. Our Linofelt booklet, "Insulation of Railway Equipment" is what you need. Write to-day.

Steel Back Brake Shoes**THE RAILWAY MATERIALS CO.**
New York - Chicago

SPECIAL MERITS OF **INDRUROID ROOFING**

Requires no coating or paint.
Acid and alkali proof.
Not affected by gases or vapors.
Elastic and pliable always.
Strong and tough.
Absolutely water proof.
Climatic changes do not affect it.

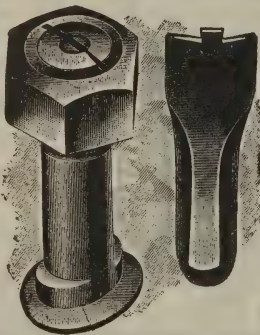

Both sides alike.
Practically fire proof.
Non-volatile.
Easily applied.
Can be used on steep or flat surfaces.
Any workman can put it on.
No odor.
Will not shrink or crack.
Light in weight.
Does not taint water.

NOTE.—INDRUROID ROOFING can be shipped (when so desired) with the Lap Cement, Caps and Nails packed in bulk separate from the roll.

This will be found advantageous in case of contract work, etc. Full directions for applying found with each roll.

PINTSCH LIGHT USED ON 217 **THE SAFETY C. H. & L. Co.**
RAILROADS 2 Rector St., New York.

AUTOFLAG

THE UNIVERSAL DANGER SIGNAL

The "AUTOFLAG" gives three separate and distinct warnings in addition to the crossing signs and the illuminated "DANGER" sign;

In The Day Time—

THE SWINGING BANNER.

At Night—

THE SWINGING RED LIGHT.

Day and Night—

THE LOUD RINGING WARNING BELL.

Each of these warnings is entirely separate and not dependent one upon the other, inasmuch as the banner operates regardless of the light or the bell, at the same time the light is illuminated regardless of the banner or the bell, and lastly the bell will ring regardless of whether the banner is swinging or the lamp lighted.

MANUFACTURED ONLY BY

BRYANT ZINC COMPANY

RAILWAY AND SIGNAL SUPPLIES

600 Orleans Street, CHICAGO -:- 50 Church Street, NEW YORK

 Railway Exchange, Chicago

JEFFERSON UNION

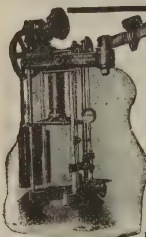

Always keeps the joint tight;
Requires no packing;

Consists of a bronze metal
seat, firmly encased in
iron;

Joint is spherical and
thoroughly ground.

Try it and be convinced
of its superior qualities.

JEFFERSON UNION CO.
Lexington, Mass., U. S. A.

WATSON-STILLMAN HYDRAULIC TOOLS WILL CUT DOWN YOUR PRODUCTION COSTS.

We make Hydraulic Punches, Shears, Riveters, Presses,
Benders Pumps, Accumulators, Jacks, etc.

which embody every improvement for speed, efficiency and economy from
hydraulic power. If you have work requiring any of the above tools our
large line probably offers a standard model that will meet the require-
ments. If not we will build to order on short notice and at reasonable cost.

Steel Back Brake Shoes THE RAILWAY MATERIALS CO.
 New York - Chicago

A Man Costs More than a Grindstone!

Carborundum is the fastest cutting grinding material in the world. It saves in labor many times its original cost, and its original cost is lessened by its durability.

The characteristic features of **CARBORUNDUM** wheels are

**DURABILITY. RAPIDITY.
SMOOTHNESS OF WORK. SAFETY.
ECONOMY GUARANTEED.**

Send for Illustrated Catalogue.

**The Carborundum Company,
NIAGARA FALLS, N. Y.**

JESSOP'S

"ARK"

High Speed Air Hardening TOOL STEEL

IS UNEXCELLED FOR TURNING LOCOMO-
TIVE TIRES, CAR WHEELS, SHAFTING, ETC.

$\frac{1}{2}$ -inch cut, $\frac{1}{4}$ -inch feed. Speed 20 to 40 feet per minute.

Tools hardened by heating white hot and cooling in air.

CAN NOT BE BURNED

Manufactured in Sheffield, Eng.

WM. JESSOP & SONS, Inc.

GORDON PRIMARY CELLS

¶ Manufactured and fully guaranteed under the specifications of the Railway Signal Association. ¶ Other sizes and types for other uses such as Telephone Train Despatching, Gas Engine Ignition, Alarms, Annunciators, Etc ¶ Investigation as to the merits of the GORDON CELL will prove decidedly interesting.

GORDON PRIMARY BATTERY CO.

General Sales Office: 50 CHURCH ST., NEW YORK
Chicago Office: People's Gas Building, Chicago, Ill.

More than a mere Tie Plate—A safety device—An economic device
—A device promoting flexibility of Track. The

LUNDIE TIE PLATE

will more than pay for itself in saving of Rail and Wheel wear and in reduction of maintenance expense, as well as performing the usual functions of a Tie Plate.

JOHN LUNDIE, 52 BROADWAY, NEW YORK

THE FRICTIONLESS RAIL

683 Atlantic Avenue, Boston.

Interesting to
all Railroad Men

12 STOPS

STOPS—Excessive thrust and lateral pressure on high rail.

STOPS—Cutting on wearing edge of high rail

STOPS—Climbing on high rail

STOPS—Elbowing of joints on high rail.

STOPS—Excessive vertical wear on low rail

STOPS—Flowing of metal on head of low rail

STOPS—Outward rolling of both rails

STOPS—Rapid cutting-in of ties

STOPS—Excessive wear of wheel flanges.

STOPS—Squealing and grinding

STOPS—Lateral motion of engine and coaches

STOPS—The necessity of applying brakes to steady train around curves

ALL OF ABOVE PROVED BY ACTUAL DEMONSTRATION

Barrett Specification Roofs

Shop Extension of the Illinois Steel
Co., Chicago, Ill.
Roofed—Advance Corning & Roofing Co., Chicago, Ill.

A Modern Shop and a Modern Roof

Here is a picture of The Barrett Specification Roof on the big new shop of the Illinois Steel Company in Chicago, laid over a concrete deck.

Cut through this roof at any point and you will find six layers of pitch and five of felt, for the method of procedure in the laying of the roof is so carefully defined in The Barrett Specification that, if it is followed, it is not possible to find any spot in the roof which does not have its full quota of pitch and felt.

This type of roofing was selected for the building because its first cost is lower than that of any other permanent form of roof covering and the cost of maintenance is absolutely nothing.

This combination of low first cost and no maintenance cost explains why there are more Barrett Specification Roofs on permanent structures than any other kind.

Another important feature is the fact that Barrett Specification Roofs take the base rate of fire insurance. In case of fire from within they form a continuous air-proof fire blanket.

All first-class structures, such as city dwellings, office, railroad and commercial buildings of all kinds should have Barrett Specification Roofs as a matter of real protection and sound economy.

A copy of The Barrett Specification, with roofing diagrams, free on request.

“MORSE” RATCHET DRILLS

For Railroad Work

Taper Square Shank Drills are designed for drilling through the Web of Rails and in Structural Material. They are made shorter, both in length over all and length of twist, than the style of drill in ordinary use, making them more convenient for ratchet work in “close” spaces and also much stronger.

The shape of the point and the temper of these drills especially fit them for drilling through Web of Rails or Channel Beams under excessive strains.

There Are 17 REASONS 17

Why Your Hoisting Engine Should be an
"AMERICAN"

Any one of them is strong enough to warrant
your selecting an "AMERICAN" over any other
engine made. *Ask us what they are*

**AMERICAN HOIST
AND DERRICK CO.**

ST. PAUL, MINN.

PNEUMATIC GATE CO.

MANUFACTURERS OF

"ELLIOTT NEW STYLE"

PURELY

PNEUMATIC GATES

Now made in sizes to operate arms of any desirable length with ease
and with satisfactory control.

When the view is sufficiently good, two or more crossings within the
limits of 1,000 feet equipped with such gates can be readily operated
by one man.

When a greater volume of compressed air than can be readily furnished
by man-power is required, the purely cylinder machinery admits of the use
of power compressed air, either from a general or a special compressed
air plant.

Used exclusively by several leading Railways. In large quantities by many others. The

Vaughan Rail Anchor holds the rail and stays tight without attention.

**Vaughan
Splice
Straightener and
Rail
Bender**

**VAUGHAN AUTOMATIC RAIL
ANCHOR**

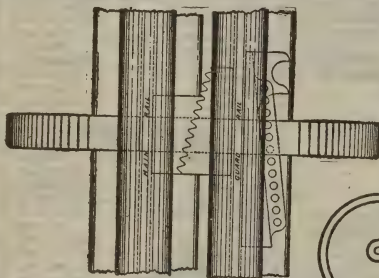

A simple and very powerful tool for straightening Bent Splices. Also, for use as an ordinary Rail Bender.

"VAUGHAN"

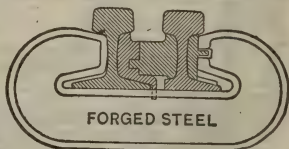

**M. W. SUPPLY CO.
PHILADELPHIA, PA.**

Vaughan Guard Rail Clamp

High Efficiency—Low Cost

The VAUGHAN Clamp has an extra wide Drop Forged steel yoke, with best quality Malleable Iron Wedge and Adjustable Fillers, and is designed to meet the demand for a hard service clamp at moderate cost.

FORGED STEEL

SECTION

Note that it bears on the web of both rails, high up under the head, and that it can be secured with cotter pin in the usual manner, or, doubly secured by spiking. The use of either or both methods of fastening is optional. Filler blocks are adjustable for any desired throat. No holes required in either main or guard rail. Easily applied and guaranteed to give satisfaction under heaviest traffic.

**American Guard Rail Fastener Co., REAL ESTATE TRUST BUILDING
PHILADELPHIA, PA.**

Electric Light for Railway Cars

Axle Equipment

The U-S-L Equipment provides a continuous supply of electrical energy derived from axle power. Each car is a distinct lighting unit and is independent of battery charging stations. This equipment is entirely automatic in operation; consists of few parts; no complications; requires little attention and is practically trouble-proof. Thousands are in operation. The standard with leading railroads.

Write for Bulletin 207

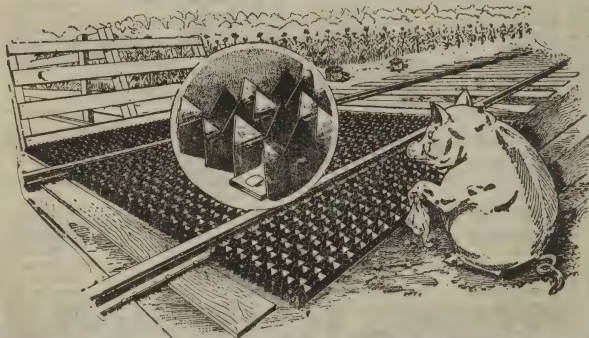

The U. S. Light & Heating Co.

ABERNATHY CATTLE GUARDS

They are **Durable, Economical and Cheap.** Less metal surface exposed to salt water dripping than any other guard. **A good Stock Law is best.** But as no commercial guard has yet stopped all stock why not try the **Abernathy Cattle Guard**, as it will stop the greatest number at the least expense. *Write for catalogue.*

RU-BER-OLD ROOFING

FOR CABS

RU-BER-OLD makes an indestructible roofing. Proof against water, steam, heat, and locomotive gases. Never leaks. Never melts. Never rots. Never tears. **The MOST DURABLE in the world.**

FOR CARS

RU-BER-OLD is superior to any other roofing. Strong. Pliable. The only prepared roofing that stands the racking of cars in motion. Cinders won't harm it. Water won't harm it.

KA-LOR-OLD

(Colored Ruberoid)

Manufactured in attractive colors—RED, GREEN, BROWN.

The permanently colored prepared roofing.

Absolutely Ideal for Stations, Bungalows, Cottages, Homes, Artistic Residences and buildings of all kinds.

THE STANDARD PAINT CO., 100 William St., New York

R.R. TANKS

MADE WHOLLY OF
BEST CYPRESS WOOD

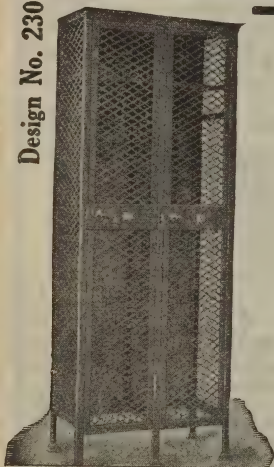

For a quarter of a century we have been building Cypress Tanks for the leading Railroads, and have never yet put up one that proved unsatisfactory. Pure Cypress Wood Tanks, as we build and finish them, come nearer being proof against all wind, water and weather conditions than is true of any other tank now made.

Write us before investing in any other make. Catalogue and information gladly furnished.

G. M. DAVIS & SON

∴ **PALATKA, FLORIDA**

Design No. 230

Your Men Have Just As Good a Right As You

to a clean and easily cleanable place
to hang their clothing

PEN-DAR Steel Lockers

will keep them contented.

They are built of expanded metal and sheet steel, and present a smooth, attractive surface.

Besides being neat to look at, they are fire-proof, vermin-proof, germ-proof and practically time-proof.

Made in units, rows, tiers or groups. Every locker furnished handsomely finished and with hooks, shelf, lock and number plate.

SAFETY ELECTRIC LIGHT
 USED ON 71 LEADING RAILROADS.

The Safety C. H. & L. Co.
 2 Rector Street, New York.

Quick Permanent Repairs By the Thermit Welding Process

Repairs broken locomotive frames without dismantling the engine. Keeps engine out of commission only one or two days. Equally valuable for welding mud rings, driving wheel spokes, connecting rods and all other broken wrought iron and steel sections.

Full information given in our pamphlet No. 2152
and "Reactions," the Thermit Quarterly

Goldschmidt Thermit Company

T. C. Grade Cypress Trunking and Capping

is made from the heartwood of the genuine swamp cypress trees, which is the most durable, and economical protection for your insulated wires. A trial order will convince you that we are not only alert to the quality of the material required, but to the necessity of quick shipments as well.

We carry a complete stock at the mill, so just specify T. C. GRADE.

"ERAC" ANTI CREEP TIE PLATE

**Most Efficient, Simplest,
and Economical Device**

A Tie Plate and Anchor combined; the "Pin" wedges tighter instead of loosening in the effort of the Rail to move forward. Labor costs saved. Installed at the time of placing Tie Plates. It is a good Tie Plate, with "Shoulders" supporting the base of the Rail on each side.

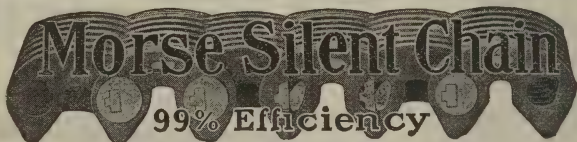

**Order your Tie Plates with the
"ERAC" Anti-Creep Feature.**

**Rolled Steel or
Malleable Iron**

**Write us for Prices,
Particulars and Samples**

**Empire Railway
Appliance Corporation**

The Waugh Draft Gear

PROTECTS YOUR CARS

Different combinations will furnish from 200,000 to 600,000 pounds spring cushion in from 2" to 3" draw bar travel, as desired. **NO RECOIL.**

Applicable to any sill spacing, eliminates slack. **Reduces cost of repairs 50 per cent.** Prevents spreading of sills, swedging of bolts, breaking of knuckles, etc. Easy of action, and of a capacity that will cushion blows which wreck cars equipped with other gears.

Are you ready to be shown?

PANTASOTE

The National Standard for car curtains and car upholstery. Twenty years' service tests have established its superiority to any other curtain material.

AGASOTE

For car headlinings and interior trim. A homogeneous waterproof board of great density and tensile strength. It will not warp, blister or separate.

FIREPROOF AGASOTE

Non-conductive qualities of heat and cold make it peculiarly well adapted for headlining and interior trim for steel fireproof passenger cars, entirely eliminating the disadvantage of steel for interior trim and giving the appearance of wood finish.

THE PANTASOTE COMPANY

11 Broadway, New York - People's Gas Bldg., Chicago
797 Monadnock Bldg., San Francisco

Jenkins Bros. Pump Valves Mean Better PUMP SERVICE.

When you require a new set of valves for your *Boiler Feed Pumps*, you are sure to have excellent results if you specify **Jenkins Bros. Pump Valves, No. 80 Compound.**

We have been making these valves for many years, and the uniformly good service which they are giving proves that they are unequalled for hot water service.

We supply pump valves in a variety of other compounds, and believe that our long experience, and knowledge of service requirements, places us in position to meet the most difficult conditions. If in doubt as to the proper compound to select, write us; we can be of service to you.

All Jenkins Bros. Pump Valves are made of the best ingredients in our own modern factory, and bear our Diamond Trade Mark.

Valves of any size or shape—for any service—prompt shipment.

THE CURTAIN SUPPLY COMPANY

320 West Ohio Street, Chicago,

has prepared the following bulletins which they will be pleased to send, postpaid, to interested readers of the Pocket List.

Bulletin C-1, The Rex All-Metal Curtain Roller.

Describing the most recent improvements in curtain roller design and manufacture. Featuring the steel extension plug and lock.

Bulletin C-2, The Rex Sash Balance.

A sash balance with seamless steel tube, removable mechanism, cables or chains attached to the roller with buttons, and to the sash with adjustable fixtures.

Bulletin C-3, The Ring Fixture

Showing all types of open and enclosed groove ring fixtures, with or without pinch handles; with or without ticket holders; specification sheet showing how to measure windows for curtains; accurate dimensioned drawings showing grooves for all purposes.

Bulletin D-1, CSCO Diaphragms.

Description of diaphragms and specification page for comparing diaphragms and for ordering.

Bulletin D-2, Rex Release Handle.

Provides a positive vestibule curtain release through webbing and trigger in handle. No strain on curtain or handle. No torn or lost curtains.

Bulletin D-3, Rex Vestibule Curtain Outfit.

Including Rex Hinged Vestibule Curtain Shield and Brackets, Curtain, Rex Release Handle, Rex No. 6 Hook, Rex Steel Vestibule Curtain Roller. Easily applied; self contained; safely enclosed and instantly accessible.

THE LATEST IMPROVED
POAGE WATER COLUMN
 EQUIPPED WITH
FENNER DROP SPOUT

Water can be taken quicker. Cost for maintenance is less than any other column. The Fenner Drop Spout reaches all heights of tenders without waste.

Open telescopic joint is non-freezable.

both single and double acting.
Tell us your conditions. We can meet them in a pump of greatest economy.

The American Well Works
General Office and Works
Aurora, Ills.
Chicago Office
First National Bank Building

"American" Pumps are Standard For Railroad Use

Nearly a half century's experience in pump building behind them. Special types of pumps made to meet every possible location instead of attempting to adapt all conditions to a single style of pump. Centrifugal pumps made in over 50 regular styles in all sizes and equipped with any power. Deep Well Turbine Centrifugals capacities 500 to 3,000 gallons per minute from depths down to 250 feet. Deep Well Plunger Pumps

LANDIS GRINDING MACHINES

For Railroad Repair and Tool Room Work

The Landis Locomotive Piston Machine is provided with a gap, built along the bed to suit the projection on the work for which it is intended. ¶ No Railroad shop is complete without one, as it will grind accurately and economically, worn or turned piston rods, valve yoke stems, axles and other parts. ¶ The Landis Universal Grinder is the most versatile grinder made—grinds straight and taper, external and internal, making it equally valuable for either the tool room or the repair shop. Send for circular.

Making and Repairing Locomotive Parts

FACTORY TIME CHECKS

No other system
 has proved so simple,
 so inexpensive to in-
 stall and so satisfac-
 tory in operation as
**The Time Check
 System.**

Our pamphlet, "Time Checks and Their Use" is
 well worth the three minutes necessary for a reading.

DON'T SCALD FIREMEN

Use Pen Flex Safety Tubing for Sprinkling Coal. It is made up with Clincher Couplings and stops Scalding Accidents.

Another new thought is Pen-Flex I.C.C. Pop Valve Tube, handier and quicker than a copper pipe.

Let us tell you about these two new devices made up with connections ready for use.

Have you learned that Copper Flexible Metal Tubing is lighter as well as safer than rubber hose and much less cumbersome than Swivel Joints—for Hydrostatic testing or Blow Off?

ECONOMY—EFFICIENCY

It's the Pen-Flex Metal—a special alloy—The result of years of experimentation that makes our tubing last where others fail.

51 Railroads are using it

Reflex Water Gages

(KLINGER TYPE)

The Water Appears Black

Our Reflex Gages assures quick and accurate reading of the water level as the water always appears **BLACK**, and **WHITE** indicates immediately the absence of water. They are safe at high pressure and are absolute protection to boilers and men in cab. They require no wire netting, etc., as the glass does not fly when disabled. They can easily be applied to any gage glass fittings without changes. Further information on request.

Kalamazoo Improved Reinforced Pressed Steel Wheels

Are furnished on all Kalamazoo Hand and Push Cars and not only that, they are interchangeable with wheels of other makes, and can be used for repairs on any cars that you may have in service. Why not give them a trial? We guarantee them to give from 50 to 100 per cent. longer wear than any other wheel of similar design or weight on the market

We also make Push and Track Laying Cars, Velocipedes, Track Jacks, Track Drills, Track Gauges, Track Levels, and a full line of Railway Track Supplies.

HEAVIER TRAINS LESS COAL PER TON MILE

MIKADO TYPE LOCOMOTIVE—CHICAGO & NORTHWESTERN RAILWAY

Total Weight of Engine, 302,000 pounds; Weight on Drivers, 227,500 pounds; Diameter of Drivers, 61 inches; Boiler Pressure, 170 pounds; Cylinders, 27 x 32 inches; Maximum Tractive Power, 55,300 pounds.

Dynamometer tests on the Chicago & Northwestern between Mikado and Consolidation locomotives, indicate that the Mikados are handling 27.8 per cent. greater tonnage than the Consolidations, and that they are saving 22.36 per cent. in coal per ton mile, and 11.17 per cent. in water per ton mile.

FERGUSON SHOP FURNACES The Railway Materials Co.
Railway Exchange, Chicago

A Portable Welding Outfit of the Highest Quality, \$60

THE Prest-O-Lite Welding apparatus is a thoroughly high-grade outfit, suitable for every purpose. The savings in reclaiming damaged or worn equipment will pay for the outfit the first day in your shops.

Prest-O-Welder

(Oxy-acetylene process)

will do many kinds of work no other process will touch. No matter what other equipment you are now using, you need the Prest-O-Welder.

Cutting torch furnished as an extra, where desired.

Unsurpassed for efficiency and economy—portability—safety—simplicity and ease of operation.

PREST-O-LITE ACETYLENE SERVICE FOR WELDING

Prest-O-Lites, furnishing the purest form of acetylene in large cylinders may be had under our liberal service plan.

The large number of Prest-O-Lite branches and charging plants insure the user unequalled acetylene service everywhere.

PREST-O-FLARE

A portable, outdoor light for illuminating wrecks or building operations and repairing right-of-way or bridges at night. No generator—requires no attention. Ready for instant service in emergencies.

\$60 Cylinders under liberal service plan.
Truck Extra.

ONE COAT **DOUBLEQUICK** CAR PAINT

Winter with its cold frosty atmosphere will soon be upon us—the season during which it is impossible for the usual paint to dry within a reasonable time when applied to work on track, or under cover of sheds which cannot be heated to the necessary drying temperature.

In order to meet the demand for goods to fill this requirement, we are turning out a demonstrated durable **One Coat** paint for speedy work on cars which we have named **DOUBLE-QUICK**, the use of which will enable you to coat a car in the morning, stencil in the early afternoon, and release for service the same day.

We recommend the **DOUBLEQUICK** goods for their convenience and durability, and as a time and money saving proposition as well, which should appeal to you.

We will be pleased to quote you interesting quantity prices for your Standard Colors, and hope to have the pleasure of hearing from you when in the market.

Railway Steel Spring Co., LATROBE LOCOMOTIVE and CAR WHEEL TIRES, New York

BYERS GENUINE WROUGHT IRON PIPE

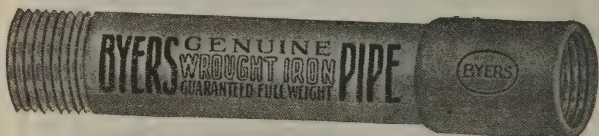

GUARANTEED FULL WEIGHT

is an unequalled Pipe Investment

It costs no more to lay or install "BYERS PIPE" than any other, yet it withstands corrosion to the greatest extent.

It will not become easily and readily pitted like other pipes, causing leakage, which means loss of money and product.

It will not have to be renewed and replaced on these accounts, but will last to the limit.

On such exposed places as condensers, where pipe is exposed to all the insidious attacks tending to destroy pipe, "BYERS PIPE" has lasted from fifteen to twenty years, while steel has existed only six or eight years.

For just the few reasons noted above, it can be readily understood that "BYERS GENUINE WROUGHT IRON PIPE" is an unequalled pipe investment.

Remember that inferior pipe is being substituted and sold for Byers Genuine Wrought Iron Pipe. Be sure to see that the name "BYERS" rolled into the iron, is on each length of pipe in order to secure BYERS Genuine Wrought Iron Pipe.

Send for booklet entitled "The Control of Quality in Every Process."

Any desired information will be gladly given relative to Byers Genuine Wrought Iron Pipe, Oil Well Tubing and Casing.

OFFICES

RY. EXCHANGE
CHICAGO39 CHURCH STREET
NEW YORK

"The acetylene light always gives a good, steady light, and one that can be depended upon at all times, as it never goes out and on account of its soft, mellow rays, it is not blinding and yet furnishes a range of vision that is ample for all emergencies. All the engineers on this line speak highly of Acetylene light."

Steel Back Brake Shoes**THE RAILWAY MATERIALS CO.**
New York • Chicago

We will guarantee to increase your present mileage 50% on all types and styles of crosshead gibs.

With Randall Graphite Sheet Lubricator cast in the Babbitt lining of crosshead gibs or any other kind of locomotive or car bearings, you can operate the bearings at a less cost than by any other method.

The graphite lubricator can be applied without changing your present shop practice or equipment.

Write us for detailed information and names of R. R. Officials who are using the material.

BARRETT

Automatic Lowering Car Jack No. 119

(IMPROVED NO. 19 MODEL.)

(PATENTS PENDING)

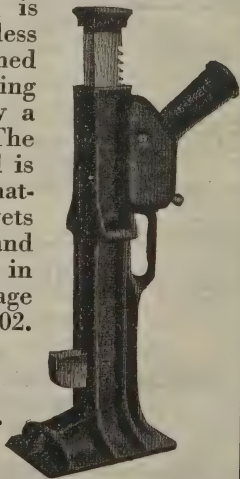

Sweeping improvements have been made in this jack, resulting in (1) easier operation, (2) greater capacity, (3) greater simplicity in operating parts, (4) lower repair cost, (5) finer adjustment and more convenient handling.

The rack is rectangular—not square—of fine pitch, and is raised by a pair of double pointed pawls, so that at least four teeth are always in mesh.

The Reversing Mechanism is reduced to only four parts—less than half the number contained in any other automatic lowering jack, and renewable at only a fraction of the usual cost. The socket lever is of steel, and is pivoted on trunnions, eliminating fulcrum pin, side plates, rivets and other small parts. These and other valuable improvements in this jack are described on page 35 of our new catalog No. 102. Did you receive your copy?

EDISON BSCON

PRIMARY BATTERY

THE EDISON PRIMARY BATTERY

is standard for heavy battery service. It represents the only commercial type capable of delivering high amperage and is in service on practically all battery-using railroads.

Type 202 Cells in Steel Tray.

The Edison Primary Cell is very economical for light duty, intermittent work, because it does not deteriorate when the circuit is open.

CATALOG ON REQUEST

THE CHEAPEST FORM OF BATTERY ENERGY

For detailed Statement of Rolling Stock, Equipment, etc., of above Companies: please refer to Table commencing page 5.

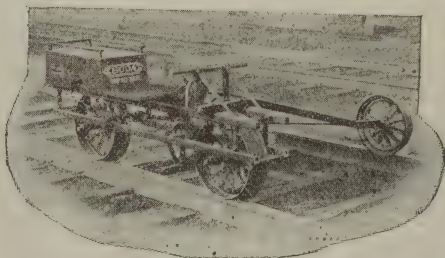

RAILROAD MOTOR CARS

are not a necessity, but they are a mighty big convenience, a labor saver and a money saver for any railroad. There are several kinds of "freak" gasoline motor cars on the market, but every railroad man who has made an investigation and compared the various makes of motor cars that are offered must admit, at least to himself, that

BUDA MOTOR CARS

for Inspection, Section, Bridge Gang and Signal Work are not in the "freak" class. They have been tried, and demonstrated their superiority over any other make.

We manufacture seven different styles of Gasoline Motor Velocipedes. Our catalogues for the asking.

WALKOVER CAR SEATS

Are a marvel in strength, lightness and durability, and give the final touch of perfection to the modern railway coach. When you come to the point of choosing a luxurious, restful seat, a durable seat, a never-break seat, one name inevitably comes to your mind

—Hale and Kilburn—
and you are at once assured against the endless troubles caused by substitutes.

Neverbreak Walkover Car Seats will stand years of hard service without repairs.

Cook's Standard Rustless INGOT IRON Cattle Guard

Made from pure American Ingot Iron. Practically rustless. The life of the guard will many times compensate for the slight additional cost over other styles of guards.

The channel strips are installed by placing side by side, spacing at equal distances, fastened to tie at ends with No. 60 wire nails.

Points of Superiority Claimed over Guards that are made in Sections.—A great saving in up-keep, as often times an entire guard is consigned to the scrap-pile, whereas with Cook's Standard Guard it is only necessary to insert one or more strips, as the case may require.

Cook's Standard Cattle Guard Co.

Office and Factory: KALAMAZOO, MICH.

Granite

TRADE MARK

ROOFING

A 6-inch lap is better than a 3-inch lap. It gives better protection against leaks and permits nailing down on the under sheet only, so that no nail heads appear on the surface. Otherwise this is the same Granite Roofing that we have sold for 80 years for use on great railroad buildings.

It is immune from damage by coal, smoke or cinders, and it has a sea grit surface which makes painting entirely needless.

Behind it is a reputation that has

PASSED THE QUARTER CENTURY MARK.

Steel Back Brake Shoes

THE RAILWAY MATERIALS CO.
 New York - Chicago

Economy of Operation

Our stoker is driven by a turbine engine which develops an average of less than 5 H. P. So easily does it do its work of pushing the coal forward from the tender and up into the fire that practically no lubrication is necessary—one drop a minute.

We know of no locomotive that is operated so economically as the STANDARD STOKER.

THE PENNSYLVANIA STEEL COMPANY

Frog and Switch Department:

STEELTON, PA.

General Sales Office: Morris Building, PHILADELPHIA, PA.

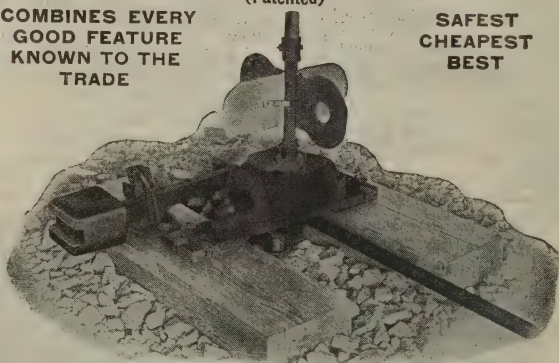

New Century Switch Stand

ADJUSTABLE OR NON-ADJUSTABLE

(Patented)

COMBINES EVERY
GOOD FEATURE
KNOWN TO THE
TRADE

SAFEST
CHEAPEST
BEST

This stand is constructed with a "lost motion" between lug and gear so that if used automatically, the lever cannot fail to fall and complete the movement of the switch.

Note connection of rod; no wrenches needed. Spindle, $2\frac{1}{8}$ in. diam. in bearings. Double malleable cranks or single forged steel cranks.

By moving one bolt from the target coupler, the target can be changed to right hand or left hand as desired.

Manard Anvil Face Frog

DESIGN 160 (PATENTED)

The latest and best type of "Manard" frog. Its durability and low cost make it the most economical manganese frog on the market.

BORDO Locomotive Swing Joints.

Fig. 59

Water Supply

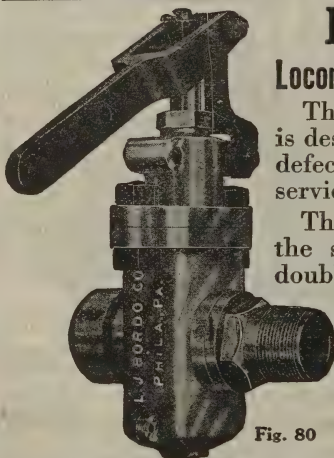

This connection is intended for use between engine and tender, and is so arranged and connected that it is a perfectly flexible joint made with Standard Iron Pipe, and will adjust itself to every oscillation of engine and tender, and is guaranteed tight for the following connections: Steam Heat, Water Supply, Air Brake

and Oil, in order to dispense with the use of rubber hose, thus avoiding delays in trains, which is caused frequently by breaking or bursting.

Fig. 59 illustrates Injector Feed Pipe Connection with Strainer in place of Tank Hose.

When ordering state size and make of Injector.

CONNECTION BETWEEN LOCOMOTIVE AND TENDER

BORDO

Locomotive Blow-off Valves

This Locomotive Blow-Off is designed to overcome all defects for this exacting service.

The gate is reversible and the seat renewable which doubles the life of Blow-Off.

A Trial Order will convince you.

No More Engine Failures

Full description and prices on application.

Davis Expansion Car Wheel Boring Tool

Will save 25% to 50% in the cost of your car wheel and axle work. Over 1600 shops of every description now equipped. Apply these tools to either your old or new machines and you'll get results. Eight years experience and expert knowledge enables us to guarantee a 25% saving in any shop regardless of what the conditions may be.

They can be applied to any Wheel Boring Machine.

"Two in One"

Davis Expansion Car Wheel Boring Tool

FOR BORING BOTH STEEL AND CAST IRON WHEELS

This tool positively has no equal for boring steel wheels. Under ordinary conditions will easily double the output of any machine to which it is applied. Only one set of cutters bore at a time.

How to order for boring these sizes.	Capacity of car.	Journal size.
We would recommend our No. 8 $\frac{1}{2}$ "Two in One" Davis Expansion Car Wheel Boring Tool.....	60,000 80,000	$4\frac{1}{4} \times 8"$ $5 \times 9"$
We would recommend our No. 7 $\frac{1}{2}$ "Two in One" Davis Expansion Car Wheel Boring Tool.....	80,000 100,000 140,000	$5 \times 9"$ $5\frac{1}{2} \times 10"$ $6 \times 11"$
We would recommend our No. 6 $\frac{1}{2}$ "Two in One" Davis Expansion Car Wheel Boring Tool.....	100,000 140,000	$5\frac{1}{2} \times 10"$ $6 \times 11"$

Our Standard Davis Expansion Car Wheel Boring Tool

FOR BORING
CAST IRON WHEELS

This tool has won its way into thousands of shops and is considered indispensable for general work, especially in shops that have a limited amount of wheel boring to do or compelled to do all of their work on one machine.

How to order for boring these sizes.	Capacity of car.	Journal size.
We would recommend our No. 9 Standard Davis Expansion Car Wheel Boring Tool.....	40,000 60,000 80,000	$3\frac{3}{4} \times 7"$ $4\frac{1}{4} \times 8"$ $5 \times 9"$
We would recommend our No. 7 Standard Davis Expansion Car Wheel Boring Tool.....	60,000 80,000 100,000	$4\frac{1}{4} \times 8"$ $5 \times 9"$ $5\frac{1}{2} \times 10"$
We would recommend our No. 5 Standard Davis Expansion Car Wheel Boring Tool.....	80,000 100,000	$5 \times 9"$ $5\frac{1}{2} \times 10"$

CONSOLIDATED RY. ELECTRIC LIGHTING AND EQUIPMENT CO., HANOVER PARK BUILDING, N. Y.

The Chicago, Milwaukee & St. Paul Trans-Continental Electrification

The contract for the complete electrification of the 113 mile engine division between Deer Lodge and Three Forks, Mont., on the main line between Chicago and the Pacific Coast, has been placed with the General Electric Company. The contract covers:

12—260 Ton Locomotives.

17000 Kilowatts in 3000 volt Motor Generator Sets with complete complement of Transformers and Switchboards for installation in four substations.

This equipment is for the heaviest locomotive service ever undertaken, and this road is the first to adopt 3000 volts direct current.

The G. E. high voltage direct current system was adopted after long and careful study. It is an epoch making event; another General Electric mile stone in the history of transportation.

60% of Last Year's Big Locomotives Equipped with Vanadium Parts

Returns from locomotive companies and from some of the roads which build engines show that 491 of the locomotives built last year had vanadium steel parts.

This number is 60% of all the locomotives weighing 225,000 pounds or over.

This is an increase of 25% over the corresponding ratio for 1913.

In a year that has been the leanest in recent history of locomotive building, these statistics prove conclusively the steadily increasing use of vanadium steel in locomotive construction as a means of reducing maintenance costs.

WE ARE MEMBERS OF THE
AUDIT BUREAU OF CIRCULATIONS

"PITTSBURGH PERFECT" **Right-of-way Fencing**

The element of safety is likewise an element of saving, so leading steam and electric railways are fencing in their rights-of-way from an economic standpoint.

"Pittsburgh Perfect" Right-of-Way Fencing is effectually barring trespassers and avoiding property disputes for many satisfied users in the United States and Canada. Made of Special-formula Open Hearth Steel Wire, thoroughly galvanized with pure zinc by the latest improved process. At every contact point the wires are

Welded by Electricity

producing a **one-piece** fabric of unified strength combined with greatest durability and economy. Easiest to string. Looks best. Made in many different designs and heights to meet every requirement of rights-of-way and station grounds.

FLOOD AND TORNADO

A Most Extreme Test

A Steel car with wood sash equipped with *Universal Weather Stripping* was in the recent Ohio flood. It stood in water above the roof with windows soaking in mud and water about five days. The flood left a layer of mud about 6 inches deep on the floor and $1\frac{1}{2}$ inches upon all window sills.

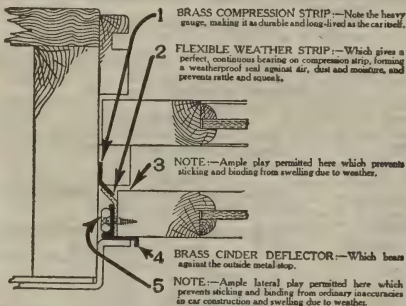

Results Were Astounding

SASH OPERATED 100% PERFECT

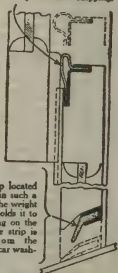

The sash in this car was inspected by the railroad representatives, every sash was raised by one hand and without friction.

AIR TEST MORE SEVERE THAN TORNADO

Just previous to the flood we had completed a test of windows in the same class of cars during negotiations with the officials for the *Sixth Large Order* from the same road in five years (the order was later awarded us), the efficiency of *Universal Weather Stripping* was tested by delivering air at 90 lb. pressure from a hose upon the joints around the outside of the sash. With this extreme velocity of air we were unable to affect the flame of a lighted match held at the joints inside of the sash.

Improved adjustable top weather stripping.

¶ Officer in charge of Purchase of Supplies.

§ Indicates Officer in charge of Car or Locomotive Painting.

★ Officer in charge of Mechanical Work, where the fact is not indicated by his title.

Features Of The *Improved Cook's Bonding Drill*

Rigidly clamped to the *rail*—no tie support is needed. It can, therefore, be used with great success for drilling rails *before* they are placed in the track.

The eccentric lever tightens the adjustable jaws on the rail in a second's time.

The clamping is so rigid that there is no tendency for the drill to move or wobble while in operation.

The general construction is remarkably strong and durable.

Get more information.

WE LEAD IN CAR REFRIGERATION

The years improvement in CAR REFRIGERATION is represented in our NEW GALVANIZED PRESSED STEEL BULKHEAD. Does away with wooden posts, wooden protection strips and screens. Much greater capacity—300 pounds LESS WEIGHT per bulkhead or 600 pounds per car.

The Bohn patent removable tank has been adopted by the

Harriman Lines
Santa Fe System
Chicago, Burlington & Quincy
Chicago Great Western
Northern Pacific
Erie Railroad
Great Northern

Chicago, Milwaukee & St. Paul
Canadian Pacific
Wells Fargo & Co.
Merchants Despatch Transportation Co.
Soo Line
Illinois Central

More than 50,000 refrigerator cars equipped with Bohn devices in daily use.

Each bulkhead has nine sections of Bohn Syphons. These raise up under the roof and lock, the ice grates folding against the end of the car. Give 19 percent. greater capacity when icing is not required.

We would be glad to go into the matter more fully with you. Write, or better still, call at our works in St. Paul, Minn.

SESSIONS-STANDARD FRICTION DRAFT GEAR
In use by 205 Companies

Made by Standard Coupler Co.
30 Church St., New York

THE PENNSYLVANIA STEEL COMPANY

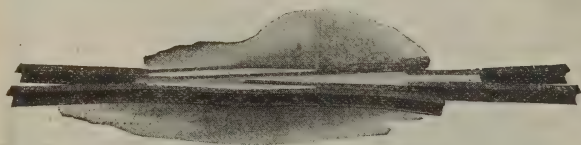

Frog and Switch Department:

STEELTON, PA.

General Sales Office: Morris Building, PHILADELPHIA, PA.

"Manard" Anvil Face Frog

Design 160 (Patented)

The latest and best type of "Manard" frog. Its durability and low cost make it the most economical manganese frog on the market.

"Manard" Anvil Face Spring Frog

(Patented)

"Manard" steel block inserted on stiff rail side, with "Perfect Surface" feature protecting frog point and wheel flanges. This frog is designed for unbroken main line service and is especially adapted for turnouts taking heavy traffic.

For mutual advantage please mention Pocket List when writing advertisers

Railway Signal Material

G. R. S. Electric Interlocking

G. R. S. Mechanical Interlocking

G. R. S. Automatic Block Signals, Direct Current

G. R. S. Automatic Block Signals, Alternating Current

G. R. S. Manually Operated Block Signals

G. R. S. Telephone Selectors

G. R. S. Electric Interlocking employing dynamic indication has been in successful service since 1901 and since its introduction to the present time, the basic principles of its operation, indication and cross protection remains the same. To-day over 24,000 levers are in service on 84 different railways.

G. R. S. Automatic Block Signal System, designed for operation by Alternating or Direct Current, is in service on all of the important railroads of this country. One of the principal devices used is the Model 2A Signal, designed for both block signaling and interlocking. Over 13,000 of these signals are in service to-day operating under widely varying conditions of both traffic and climate.

A. P. Block System is an automatic signal system for single track operation. The advantage of this system over other single track systems is in greater facility of train movement. Opposing trains are prevented from entering the same piece of single track between sidings, but trains moving in a like direction are permitted to follow one another as closely as though they were running on one track of a double track line. All apparatus used in the above named systems is manufactured on a high standard, and its use results in an economy both of maintenance and operation.

The experience of twenty years in
the building of

Creco Brake Beams

has evolved designs and constructions which not only meet present requirements, but allow an ample factor of safety to take care of the increasing demands of service. . . .

Creco Side Bearings

are another result of long experience with the conditions to be met.
